January 19, 2007

To Whom it may concern,

As of February 6, 2006 listing published by the Office of Environmental Health Hazard Assessment (OEHHA) of the California EPA, Sodium Carbonate is not listed as a Proposition 65 regulated chemical.

The raw material used to produce sodium carbonate is trona ore which mined from a natural deposit and does not contain any contaminants or bi-products known to the State of California to cause cancer or reproductive toxicity as listed under Proposition 65 State Drinking Water and Toxic Enforcement Act.

To the best of our knowledge, our process additives (guar gum, perlite filteraid, anti-foam) do not contain any ingredients, contaminants or bi-products known to the State of California to cause cancer or reproductive toxicity as listed under Proposition 65 State Drinking Water and Toxic Enforcement Act.

If you have any further questions, please call me at (307) 872-3431.

Sincerely,

A handwritten signature in blue ink that reads "Victor E. Braman" with a long horizontal flourish extending to the right.

Victor E. Braman
Manager, Technical Services
